Introduction

Welcome

Whether you're a seasoned veteran or brand new to Matrix™, we'd like to welcome you to version 7.0.

Matrix is mobile friendly, cross-browser compatible and has long been considered, by many, the most intuitive MLS software available today. However, like most new learning curves, there may sometimes be confusion along the way. Well, you can relax and consider this manual your personal guide to help get you to where you need to be in the quickest, most productive, way possible.

The Matrix team is always looking for new ways to improve an agent's user experience. Whether developing efficiency-rich features or creating in-depth training tutorials, we are committed to bringing the best out in you.

A few things you should know.

Matrix is currently used by over 600,000 real estate professionals. However, because no two MLS's, or Associations, are exactly alike, some of the fields, data and images used in this guide may differ slightly from the system that you're currently working on. Rest assured, however, that the concepts are the same and that you will easily recognize the ones used here with those of your own.

Secondly, Matrix is an online MLS software system so you must be using an active Internet connection.

Third, all highlighted fields in Matrix are mandatory and must be completed before you are able to proceed with that feature.

Finally, if after reading this guide, you're still unclear about anything, we invite you to check out the video tutorials found in the, "Agent Support" section at www.corelogic.com/matrixhelp.

Enjoy.

The Matrix Team
