# Meet the new Authentisign

Simply Better Signings

A SIMPLE, CLEAR INTERFACE

The new intuitive interface allows you to easily drag, drop, delete and rotate pages. The upgraded signing details page and Participant Viewallows you to act quickly. Plus, the crisp documents and signatures makes it easier than ever for your clients.
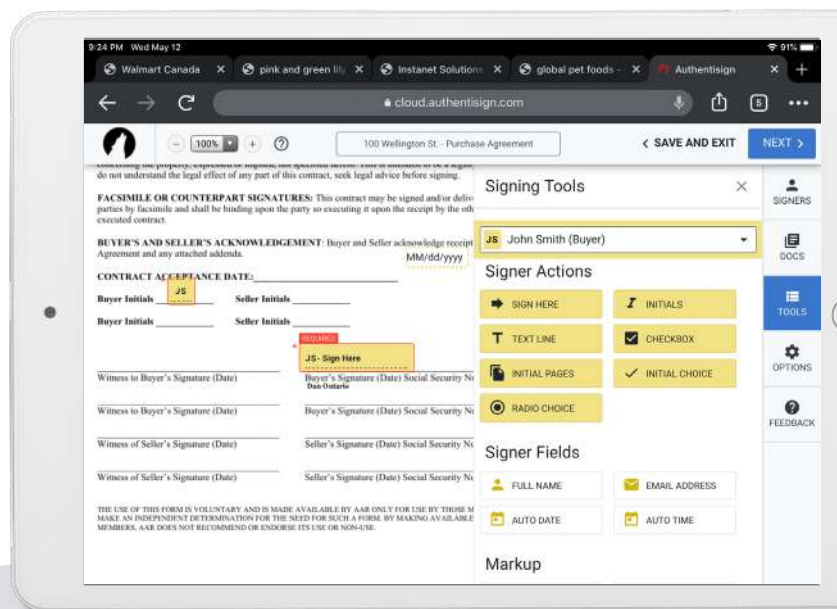

IMPROVED SIGNER EXPERIENCE

Signings are now easier than ever and can be completed in just 4 steps—agree to terms of service, click to sign, set their signature, sign and that's it! Plus, now there are no more passwords, for a simpler experience .
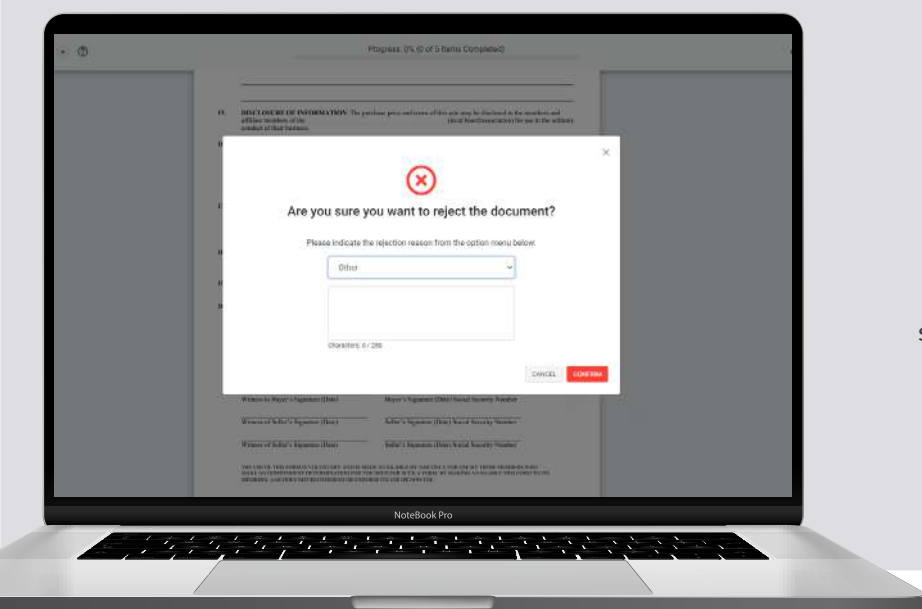

FASTER THAN EVER

Now you can complete signings in half the time! We've removed the signing wizard and added templates so you can save default annotation properties and create automatic signature blocks. Plus, with an active sync between Transactions (TransactionDesk Edition) you only have to enter contact information once.

NEW INSIGHTS AND SIGNER FEEDBACK

Now you can quickly correct rejected signatures and have access into insights so you know why a signature was not accepted. Plus, signers now have an option to provide feedback after they are completed so you'll always be in-the-know.
