

How to Rotate a Photo in Add/Edit

From your photo upload screen, click the “View Photo” icon for the photo you want to rotate.

The screenshot shows the 'Media' section of the NorthstarMLS interface. It features three tabs: 'Photos', 'Supplements', and 'Virtual Tours'. Below the tabs is an 'Upload Photos' button and a status box for 'house6.jpg' indicating 'All images received.' A photo of a house is displayed with a '1' in the top left corner. In the top right corner of the photo, there are two icons: a 'View Photo' icon (a square with a diagonal arrow) and a 'Delete' icon (a red circle with an 'X'). A blue circle highlights the 'View Photo' icon, and a blue arrow points from the text 'View Photo icon' to it. Below the photo is a text input field labeled 'Add Caption'.

In the view window, click the Rotate button to rotate the photo 90 degrees.

Keep clicking the photo until the image is upright. Then click the Save Changes button.
