286 **N. RADON DISCLOSURE:** (The following Seller disclosure satisfies MN Statute 144.496.)

287 **RADON WARNING STATEMENT:** The Minnesota Department of Health strongly recommends that ALL
288 homebuyers have an indoor radon test performed prior to purchase or taking occupancy, and recommends
289 having the radon levels mitigated if elevated radon concentrations are found. Elevated radon concentrations can
290 easily be reduced by a qualified, certified, or licensed, if applicable, radon mitigator.

291 Every buyer of any interest in residential real property is notified that the property may present exposure to
292 dangerous levels of indoor radon gas that may place occupants at risk of developing radon-induced lung cancer.
293 Radon, a Class A human carcinogen, is the leading cause of lung cancer in non-smokers and the second leading
294 cause overall. The seller of any interest in residential real property is required to provide the buyer with any
295 information on radon test results of the dwelling.

296 **RADON IN REAL ESTATE:** By signing this Statement, Buyer hereby acknowledges receipt of the Minnesota
297 Department of Health's publication entitled **Radon in Real Estate Transactions**, which is attached hereto and
298 can be found at www.health.state.mn.us/communities/environment/air/radon/radonre.html.

299 A seller who fails to disclose the information required under MN Statute 144.496, and is aware of material facts
300 pertaining to radon concentrations in the Property, is liable to the Buyer. A buyer who is injured by a violation of MN
301 Statute 144.496 may bring a civil action and recover damages and receive other equitable relief as determined by
302 the court. Any such action must be commenced within two years after the date on which the buyer closed the
303 purchase or transfer of the real Property.

304 **SELLER'S REPRESENTATIONS:** The following are representations made by Seller to the extent of Seller's actual

322. Property located at 715 12th St N, Breckenridge 55520

323. **P. OTHER DEFECTS AND ADDITIONAL COMMENTS:** Are there any other material facts that could
324. adversely and substantially affect the Seller's use or enjoyment of the Property or any intended use of the

325. Property? Yes ☒ No ☐

330. new filter + heater pool - 2022

331. new fireplace facing 2020

332. new garage doors + openers - 2024

333. **Q. WATER INTRUSION AND MOLD GROWTH:** Studies have shown that various forms of water intrusion affect
334. many homes. Water intrusion may occur from exterior moisture entering the home and/or interior moisture
335. leaving the home.

336. Examples of exterior moisture sources may be:

337. • improper flashing around windows and doors,
338. • improper grading,
339. • flooding,
340. • roof leaks.

341. Examples of interior moisture sources may be:

342. • plumbing leaks,
343. • condensation (caused by indoor humidity that is too high or surfaces that are too cold),
344. • overflow from tubs, sinks, or toilets,
345. • firewood stored indoors,
346. • humidifier use,
347. • inadequate venting of kitchen and bath humidity,
348. • improper venting of clothes dryer exhaust outdoors (including electrical dryers),
349. • line-drying laundry indoors,
350. • houseplants—watering them can generate large amounts of moisture.

351. In addition to the possible structural damage water intrusion may do to the Property, water intrusion may also result
352. in the growth of mold, mildew, and other fungi. Mold growth may also cause structural damage to the Property.
353. Therefore, it is very important to detect and remediate water intrusion problems.

354. Fungi are present everywhere in our environment, both indoors and outdoors. Many molds are beneficial to
355. humans. However, molds have the ability to produce mycotoxins that may have a potential to cause serious
356. health problems, particularly in some immunocompromised individuals and people who have asthma or allergies
357. to mold.

358. To complicate matters, mold growth is often difficult to detect, as it frequently grows within the wall structure. If you
359. have a concern about water intrusion or the resulting mold/mildew/fungi growth, you may want to consider having the
360. Property inspected for moisture problems before entering into a purchase agreement or as a condition of your
361. purchase agreement. Such an analysis is particularly advisable if you observe staining or musty odors on the
362. Property.

363. **R. NOTICE REGARDING PREDATORY OFFENDER INFORMATION:** Information regarding the predatory
364. offender registry and persons registered with the predatory offender registry under MN Statue 243.166
365. may be obtained by contacting the local law enforcement offices in the community where the property
366. is located or the Minnesota Department of Corrections at (651) 361-7200, or from the Department of
367. Corrections web site at <https://coms.doc.state.mn.us/publicregistrantsearch>.

Radon in Real Estate Transactions

HB
BF

All Minnesotans are exposed to a dangerous amount of radon gas. Radon is a colorless and odorless gas that comes from natural sources both inside and outside the home. When inhaled, its radioactive particles can damage the lungs. Prolonged exposure to radon can lead to lung cancer. About 21,000 lung cancer deaths each year in the United States are caused by radon.

The only way to know how much radon gas has entered the home is to conduct a radon test. MDH estimates 2 in 5 homes exceed the 4.0 pCi/L (picocuries per liter) action level. Whether a home is old or new, any home can have high levels of radon.

The purpose of this publication is to educate and inform potential home buyers of the risks of radon exposure, and how to test for and reduce radon as part of real estate transactions.

Disclosure Requirements

Effective January 1, 2014, the Minnesota Radon Awareness Act requires specific disclosure and education be provided to potential home buyers during residential real estate transactions in Minnesota.

Before signing a purchase agreement to sell or transfer residential real property, the seller shall provide this publication and shall disclose in writing to the buyer:

1. whether a radon test or tests have occurred on the property
2. the most current records and reports pertaining to radon concentrations within the dwelling
3. a description of any radon levels, mitigation, or remediation
4. information on the radon mitigation system, if a system was installed
5. a radon warning statement

Radon Facts

How dangerous is radon? Radon is the number one cause of lung cancer in nonsmokers, and the second leading cause overall. Your risk for lung cancer increases with higher levels of radon, prolonged exposure, and whether or not you are a current smoker or former smoker.

Where is your greatest exposure to radon? For most Minnesotans, your greatest exposure is at home where radon can concentrate indoors.

What is the recommended action based on my results? If the average radon in the home is at or above 4.0 pCi/L, the home's radon level should be reduced. Also, consider mitigating if radon levels are between 2.0 pCi/L and 3.9 pCi/L. Any amount of radon, even below the recommended action level, carries some risk. A home's radon levels may change in the future, so test every 2-5 years, or sooner if there is major remodeling or changes to the foundation, heating, cooling, or ventilation.

Radon Warning Statement

"The Minnesota Department of Health strongly recommends that ALL home buyers have an indoor radon test performed prior to purchase or taking occupancy, and recommends having the radon levels mitigated if elevated radon concentrations are found. Elevated radon concentrations can easily be reduced by a qualified, certified, or licensed, if applicable, radon mitigator.

Every buyer of any interest in residential real property is notified that the property may present exposure to dangerous levels of indoor radon gas that may place the occupants at risk of developing radon-induced lung cancer. Radon, a Class A human carcinogen, is the leading cause of lung cancer in nonsmokers and the second leading cause overall. The seller of any interest in residential real property is required to provide the buyer with any information on radon test results of the dwelling."
